With each Stirling Ultracold SU780UE Ultra-Low Freezer Ordered By April 30th
UC San Diego Special Pricing

BEST FOR SUSTAINABILITY:
- Uses less than 1/3 the energy of typical compressor-based systems (<9 kWh/day* @ -80°C Steady-State)
- Uses EPA SNAP-approved 100% Natural Refrigerants
- Significantly smaller operating carbon footprint than any competing product.

BEST FOR THE LABORATORY:
- Maintains ± 1°C Temperature Stability in Steady State Operation
- 100% adaptive control - industry’s fastest temperature pull-down and recovery.
- Superior Stirling engine reliability with only two moving parts - no compressors to fail!

BEST FOR FACILITIES & OPERATIONS:
- Lowest Total Cost of Ownership
- Significantly Reduces HVAC Cost, Electrical Power Infrastructure, and Backup Power Requirements
- Plugs into Any Outlet, including 100V and 240V (110V to 240V, 50Hz to 60Hz)

* 9.24kWh/day Confirmed by publically submitted test data using the EPA ENERGY STAR® Final Test Method
