

Green Lab Energy Metering

1. Why participate?

- Learn more about your lab's energy consumption
- Free SMART plugs to help track energy consumption
- Chance to get energy insights on various lab equipment
- Gain recommendations for energy savings

2. How to participate

- Schedule a lab audit with us at the earliest convenience
- Review all lab equipment and power measurements
- Discuss next steps based on results such as recommended practices, changing models, etc.

3. Our Strategy

- Monitor patterns for lab equipment energy usage in OFF, STANDBY and ON modes
- Ideal candidates for SMART Plugs: devices that use 5 watts or more during STANDBY or OFF
- Evaluate cost of critical equipment

4. Meet the Team!

- Kleissl Lab collaboration with Green Lab Program
- Participating labs contribute to our understanding of lab energy consumption, opportunities for savings, and celebration of best practices
